

God Worlds of Dhunami

UPPER ATMOSPHERE

Tunnel of Yreka
(why-oo-kah)

This tunnel divides the Psychic Worlds from those of the Upper Atmosphere. Only the Living Master of the Time can take Soul through this tunnel when it is ready for the Soul initiation.

PSYCHIC WORLDS

- 1- Dhunami Introduction - Gobi Desert - Sri Banjani
- 2- Katsupari Monestary - Tibet - Sri Fubbi Quantz
- 3- Gare-Hira Temple - Tibet - Sri Yaubl Sacabi
- 4- Moksha Temple - Retz, Venus - Sri Rami Nuri

A clear understanding of the God Worlds Chart will serve each chela well on their personal journey through these regions. It is a road map offered by those who have traveled through and explored those regions, namely the Dhunami Masters.

This new chart now includes a listing of the Wisdom Temples on each plane as well as information about the concentration of Divine Spirit at each level. For example, in the Anami Lok, beginning in the Upper Atmosphere or what we know as the Pure, Positive Worlds of Sugmad, the force, or concentration of Divine Spirit is full and complete at 100%. You'll notice that anywhere below the Anami Lok, the concentration of Divine Spirit is reduced a little. Each time the force and vibration of Divine Dhunami Spirit is reduced, a new plane is formed containing entirely new and different characteristics than the last.

When the Soul Plane is reached, Divine Spirit is in perfect balance or at a zero percent concentration, if you will. It does not mean that there is no Divine Spirit on that plane, all it means is that the vibratory rate has been reduced to the point of a marvelous stability; an equilibrium of the great force that exists in the areas above it. This Divine equipoise allows for the creation of the first manifestation of Sugmad in a form that is recognizable to those of us who are occupying a physical body. This being is known as Sat Nam, meaning "true name." Sat Nam's appearance is described in Sri Paul Twitchell's chronicle of his personal journey through both the psychic worlds and the upper atmosphere called, The Tiger's Fang (copies prior to 1983).

Between the Etheric and Soul Planes is a vast, black expanse known as the tunnel of Yreka (Why-oo-kah). This is a protective barrier established by Divine Spirit between the lower and upper atmosphere. Soul must be carefully prepared for passing through that tunnel by the Living Dhunami Master of the Time. The transition from dwelling in the psychic planes where matter is mixed with Spirit, to venturing into the first world where only pure Spirit exists, requires a careful and specific adjustment to the chela's vibratory rate. When the adjustment is made, Soul radiates with the brilliance of 16 suns and moons when viewed in It's natural form!

Dhunami is the only path in existence that has the Living Master of the Time who, in Soul, is able to prepare and take the chela through this tunnel and into the Pure, Positive Worlds of the Upper Atmosphere. All other teachings, known or unknown, are offshoots and watered down versions of Dhunami. Once called Eckankar, once ATOM, Ancient Teachings of the Masters, and before that many other titles, it is the original fountainhead of the source of all life. Those who learn to trace the Golden Thread of Dhunami back to It's origins in the Upper Atmosphere will be the Dhunami Masters and Saints to come.

Learning, and contemplating upon the planes of existence, the Wisdom Temples, and the concept of the force of Divine Spirit in each area, will assist the chela in presenting the path of Dhunami to those who are ready. It will also help to facilitate the genuine inner experience in the God Worlds of Dhunami.
